

CAMPBELL COUNTY TRASH FOR CASH PROGRAM

SAFETY TIPS

CLOTHING REQUIREMENTS:

- If possible wear bright colored clothing under the supplied safety vests
- Wear hard-soled shoes with no open toes
- Wear long pants (yes, even in warm weather)
- Use gloves when handling litter

CLEANUP TEAMS:

- Children under the age of 18 should have the supervision of at least one adult for every four children under the age of 18.
- Use a buddy system. Groups of youth should stick together in pairs, especially near waterways.

SAFE WORKING TIPS:

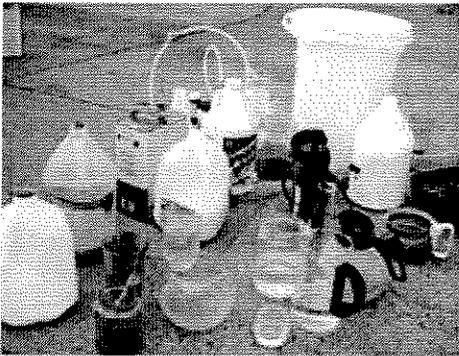

- All normal safe working precautions should apply
- Do not use electrical equipment around water
- Don't over extend when lifting or reaching
- Turn over things including tires before lifting; be very careful with tires, they make nice homes for snakes and or mosquitoes
- Hazardous materials including IV needles or syringes may require an adult with rubber gloves or a qualified person to handle and dispose of the object. If fear full, please make a not and contact the Campbell SWC right away.
- Chemicals and similar items should be reported to the proper authorizes (Campbell County Emergency Mgt. 635-1111).
- Use gloves when handling any type of debris
- An adult should be in charge of transportation and pedestrian traffic after arrival at the work site
- Do not try to lift appliances, tires filled with mud or water or other heavy items. Instead take note and tell the Campbell SWC.

Thank you for your help, hard work and support for this project!
Remember to please work safely.

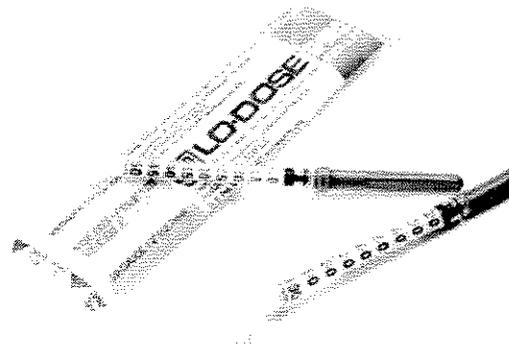

CAMPBELL COUNTY TRASH FOR CASH PROGRAM

Local narcotics officials have notified all groups doing cleanups to be aware of the following items because they may be related to the production of Methamphetamine.

If you see these items, *call 911 immediately*. DO NOT touch or pick up anything that seems suspicious.

Contents of a Meth Lab

Also, be wary of two-liter bottles or mason jars containing liquids, especially liquids that have separated into different layers.

Igloo coolers sealed with duct tape are another sign of drug manufacture.

Propane tanks are used to house chemicals for meth manufacturing. Be wary of propane tanks without lids, and tanks where the brass valve has turned *blue*.
